

Public Warehousing System Customer Web Access

St. George provides login access run reports, verify inventory totals and view activity status.

From the STG home page you must log in to your account to access or information or process orders.

After a successful login you will be directed to the Home page of your account.

The screenshot shows the STG customer web portal. At the top is a navigation menu with tabs: Home, Containers, ITs, Exports, Storage, Reports, Alerts, Balance Due, and My Account. Below the menu is a main content area with a header announcement: "St. George Logistics (STG) is proud to announce upgrades to our customer web portal. The STG web portal incorporates current best practices and powered by our new CMS 2.0 platform." This is followed by a list of improvements to the new web portal, including advanced reports, event notifications, CIJCC of IPI cargo, streamlined navigation, and online load plans. Below the list is a paragraph about the new functionality and a link to online tutorials. At the bottom of the main content area are four service categories: Containers, ITs, Exports, and Storage, each with a brief description of the services provided.

Select the **Storage** tab to access the PWS cargo.

The screenshot shows the STG customer web portal navigation menu. The tabs are: Home, Containers, ITs, Exports, Storage, Reports, Alerts, Balance Due, and My Account. The Storage tab is highlighted with a red circle. Below the menu is a main content area with a header for Reports: "Reports" and a sub-header: "Run reports on your inventory and order history."

The Storage Tab will allow access to Reports

[Inventory By SKU](#)

This report comes in summary or detail. Summary lists all products by customer with quantities on as of date. Also listed are reserved and expected quantities.

Detail report lists individual pallets with quantities in inventory including any reserved quantities.

[Manifest Activity](#)

Listing of all inbound manifest, outbound releases, or both during a specified time period. Once a manifest is displayed other users can drill down to display details.

[SKU Activity](#)

Listing of all receipts and shipments for a particular SKU including starting and ending inventory. Details also include manifest, release, and pallet information.

[Top Shipto Report](#)

Listing of top shipto codes with quantities.

[Top Items Report](#)

Listing of top SKUs shipped during a period.

[On Hold](#)
